24' Windmill Tower

This is one of the tallest windmills on the market! Impressive 24' tower stands over 27 feet tall when fully erected. Designed to fit any OWS 20' windmill, this extension kit gives you an extra 4' in height. This tower will really catch the wind!

24' Galvanized Extension Kit

Item # AWS 0108

Ship Wt. 98 lbs.

24' Powder Coated Extension Kit

Item # AWS0109

Ship Wt. 102 lbs.

4 Legged Windmill Tower

We now offer a 4 Legged windmill tower for customers who prefer to have an extra leg! We've sold thousands of towers with 3 leg's, but some customers just want an extra one. Tower measures 20' in height or over 23' with the head. Comes in both galvanized and a broad range of powder coated colors. Kit includes the 4th leg, cross members and cross braces, 4 sided tower cone, extra stake clamps and ground rod. Fits any OWS 20' Windmill.

4th Leg Conversion Kit Galvanized

Ship Wt. 147 lbs

4th Leg Conversion Kit Powder Coated

Item # AWS0105

Ship Wt. 152 lbs.

Pheasants Forever Windmills

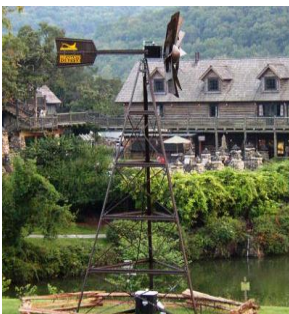

Do you have a passion for Pheasants or Quail or just wildlife in general? Outdoor Water Solutions is now offering officially licensed Pheasants Forever branded windmills in four unique styles. A portion of each sale is then used to pay for upland game habitat restoration.

9' Galvanized Backyard Windmill Item # PFW0117

9' Bronze Powder Coat Backyard Windmill Item # PFW0118

20' Galvanized Aeration Windmill Item # PFW0115

20' Bronze Powder Coat Windmill Item # PFW0116

Rubber Membrane Diffuser

We've searched far and wide to come up with a rubber membrane diffuser that can generate a ton of air. This 9" membrane is used in the water treatment industry to really move the water through its precision perforated slits. Unit comes with a built in backflow valve and 1/2" fittings to plug into your 1/2" airline. Rated for up to 5 CFM and perfect for lakes and ponds, especially where you're only running one diffuser.

Item # ARS0120

Ship Wt. 4 lbs.

100' Bubble Tubing

Perfect for shallow ponds! Getting adequate aeration into ponds that are 3-8' deep is a real challenge. Most diffusers work great on ponds 7-8' or deeper but are not designed to aerate shallow bodies of water. Our new Bubble Tubing works great with our Aeration Windmills or our AerMaster's to provide more effective aeration in shallow ponds.

Item # ARL0119 Ship Wt. 20 lbs.

Deep Well Water Pump

Pumping water out of a well is a real challenge, especially if you don't have electricity. Solar powered pumps are very expensive, whereas wind powered pumps are not. This 2" pump is submerged and uses air pressure to pump water to the surface.

Item # PMP0123

Ship Wt. 2 lbs

Aerator Control Box

This innovative new product allows you to aerate 24/7 with a windmill and an electric aerator. Designed to monitor airflow from the windmill and regulate when your electric aerator runs. Great way to save money and be green!

Item # ARL0103

Ship Wt. 4 lbs.

Windmill & Electric Aerator Combo Package

Want to aerate 24 hours a day but use the wind to help save you money and electricity? Our new Aerator Control Box utilizes an air pressure sensor to regulate your aeration needs. If the wind stops blowing, this control box will turn on your electric aeration system. If the wind blows, it shuts off your electric aerator saving money and electricity.

- Package includes one of our 20' Deluxe Windmills which includes 100' polytubing, 200' weighted airline, 2 airstones with foot valves, 2 airstone housing buckets, 2 duck decoy markers, 1 2-way selector valve and hose connectors. It also includes our AerMaster Electric Aerator and our Aerator Control Box.
- You only need one airline running out to your pond. Both the windmill and electric aerator are connected to the same airline saving you money. Item # AWS0127 Ship Wt. 480 lbs.
